OBJECTIVE

Full-Stack Developer with hands-on experience building production-grade MERN and Next.js applications. Shipped six real-world projects spanning URL shorteners, real-time collaboration tools, and booking SaaS platforms. Actively seeking full-stack developer roles where I can contribute from day one.

EDUCATION

Bachelor of Computer Application, CCS University 2024 - 2027

SKILLS

Technical Skills	JavaScript, TypeScript, Python, C++, C, Java
Frameworks & Libraries	React.js, Next.js, Node.js, Express.js, Tailwind CSS, Prisma, Redux
Databases & Caching	MongoDB, PostgreSQL, MySQL, Redis, Firebase
Tools & Platforms	Git, GitHub, Docker, AWS, VS Code, Postman, Vercel
Concepts	REST APIs, WebRTC, Socket.io, BullMQ, DSA, OOP, DBMS, Operating Systems

EXPERIENCE

Full Stack developer May 2025 - Aug 2025
Blackspire *Delhi, India*

- Worked on client web applications as a Junior Software Development Intern.

Software developer May 2024 - Present
Fiverr, Freelancer *Delhi, India*

- Working as a freelance full-stack developer, building complete web apps using MongoDB, Express.js, React, Next.js Node.js and React Native Apps. Handled everything from front-end UI to back-end APIs and deployment.

PROJECTS

LetsMeet Peer-to-peer video calling app using WebRTC mesh audio/video travel browser-to-browser, never through a media server. Built with Next.js, Socket.io signaling server, MongoDB Atlas (TTL-indexed rooms), and Google OAuth; includes a waiting-room lobby with host accept/decline flow.

AlgoAnalyzer Full-stack algorithm visualizer (React + Express) with step-by-step execution, live line-by-line code highlighting in Java and C++, side-by-side algorithm comparison on the same input, and an AI Code Analyzer backed by a PostgreSQL admin dashboard for algorithm metadata.

TextToSQL Natural-language-to-SQL assistant built with Next.js and OpenRouter. Uses schema-aware prompting (real table/column definitions injected into context), rejects non-`SELECT` queries via static parse validation, and enforces read-only DB sandboxing as a second layer SQL always shown for transparency.

ResumeTailor AI-powered resume tailoring tool built with Next.js and OpenRouter. Stores resume as structured JSON and uses it to power three views simultaneously: an interactive editor, a public portfolio page, and a one-click LaTeX export in a real resume class ATS-aligned keyword rewriting per job description.

snip.dev Production-grade URL shortener on the MERN stack with a Redis-first redirect cache async click analytics ensure redirects never block on DB writes. Implements collision-safe `nanoid` ID generation, 30-day link expiry via MongoDB TTL index,custom aliases, and per-IP rate limiting.

ACHIEVEMENTS

- **Bharat Shiksha Expo 2025 (Winner)** Recognized for best innovation and social impact with AI companion project built using React, Vite and Firebase.
- **lead Many hackathon** As a leader, I have led many hackathons and guided my team to achieve deserving positions.
